Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kristyne Bullock on September 24, 2007.

The following changes have been made:

- 1) Claim 11, second line, immediately after "enzyme" there has been inserted --- comprising a protease which has been ---
- 2) Claim 11, second line, "natural" has been deleted and replaced with --- a ---.
- 3) Claim 11, second line, "products that" has been deleted.
- 4) Claim 11, second line, immediately before "is" there has been inserted --- and wherein said enzyme ---

5) Claim 46, last two lines, “ , optionally,” has been deleted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As discussed by applicant (remarks, page 7, third paragraph), the prior art provides no reasonable expectation that enzymes could be incorporated into a gum base in a chewable confectionary while achieving the instantly claimed storage stability. The specification clearly and repeatedly teaches that low water content and processing at temperatures less than 80 degrees Celsius are critical to providing enzyme-containing chewable confectionary compositions having the instantly claimed storage stabilities. See page 8, lines 22-34; see also page 3, line 25-30. There is no objective evidence of record to refute these statements, which are factually corroborated by the data presented in the instant working examples. Indeed, the placement of the enzyme in the outer coating rather than the gum base in previously applied ES 2 131 006 (the closest prior art of record insofar as it discloses a chewing gum containing papain) factually supports this line of reasoning.

USP 5,236,720, newly cited, further illustrates that the typical water content of sugarless (a.k.a. noncariogenic) chewing gums is known to be 5 percent or greater. Accordingly, this supports applicant's position as well.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
